

Sulyman Khalil

Lahore, Pakistan | +92 370 7843216 | sulymankhalil.dev@gmail.com | in/sulymankhalil

Professional Summary

Turning complex problems into clean, fast and scalable full stack solutions. Full Stack Developer with 1+ year of experience building web apps using React, Next.js, Node.js, Express.js, NestJS, TypeScript, PostgreSQL and MongoDB. Experienced in designing responsive user interfaces, developing REST APIs, integrating frontend and backend systems and using AI-assisted development workflows to improve productivity. Currently expanding expertise in WebRTC and FFmpeg for real-time video streaming applications.

Technical Skills

- Languages: JavaScript (ES6+) & TypeScript
- Frontend: React.js, Next.js, Vue.js, Angular, Umi.js, Tailwind CSS, Bootstrap, Material UI & Ant Design
- Backend: Node.js, Express.js & Nest.js
- Database: PostgreSQL, MongoDB
- State Management: Redux Toolkit, Context API
- Video Streaming: WebRTC & FFmpeg
- AI Engineering: Prompt Engineering, Context Engineering and Loop Engineering using tmux, Herdr, Claude and Cursor

Professional Experience

MultiConnect Horizon Ltd. | Hong Kong • Remote

• Software Engineer (Full Time) | June 2025 – Present

- Used AI-assisted development workflows to improve development efficiency, debugging and code quality across web applications.
- Built responsive frontend interfaces using React and Next.js with a focus on reusable components and clean user experiences.
- Developed RESTful APIs using Node.js, Express.js and NestJS, integrating them with frontend applications.
- Worked with PostgreSQL and MongoDB to design and integrate database solutions for web applications.
- Contributed to the development and maintenance of full stack web applications by implementing features and resolving issues across the frontend and backend.

• Software Engineer (Intern) | April 2025 – May 2025

- Gained hands-on experience developing web applications using React, Next.js, Node.js, Express.js, and REST APIs.
- Gained practical experience using AI-assisted development workflows to support development, debugging, and feature implementation.
- Collaborated with senior developers to learn modern full stack development practices while contributing to real-world web applications.

Key Projects

- AILH: Web platform for the Hong Kong University of Science and Technology connecting researchers, faculty and initiatives.
- Click n Wash App: On-demand car wash booking platform offering seamless scheduling, payments and service management for customers.
- Task Flow: React task management app with RBAC, i18n, priority scheduling, auto-overdue detection and smart task pipeline, built with Umi.js, Ant Design and Day.js.

Education

BS in Software Engineering

Note: Strong foundation in full stack with AI-assisted development experience and growing expertise in system design, scalable architecture and real-time video streaming.
